

**Table 1: Weatherization Energy Audit Procedures, Priority Lists, and GHW Lists Reviewed Since 1998**

State	Single Family			Multi-Family			Mobile Home		
	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures
Alabama	Whole-house weatherization training in Alabama concluded in August 2004, which included energy audit procedures for single-family homes. DOE needs to approve Alabama's procedures in writing for proper documentation.	Whole-house weatherization training in Alabama concluded in August 2004, which included development of a priority list for single-family homes. DOE needs to approve Alabama's priority list in writing for proper documentation.							
Alaska	On 1/22/02, DOE approved Alaska's request to re-certify AKWarm single-family homes. Alaska plans to update its AKWarm software in the near future.	On 1/22/02, DOE approved three regional priority lists for use on single-family homes	Alaska will install those GHW measures pre-approved by DOE.	On 1/22/02, DOE approved Alaska's request to re-certify AKWarm for multi-family buildings. Alaska plans to update its AKWarm software in the near future.	On 1/22/02, DOE approved three regional priority lists for use on multi-family buildings.	Alaska will install those GHW measures pre-approved by DOE.	On 1/22/02, DOE approved Alaska's request to re-certify AKWarm for mobile homes. Alaska plans to update its AKWarm software in the near future.	On 1/22/02, DOE approved three regional priority lists for use on mobile homes.	Alaska will install those GHW measures pre-approved by DOE.
Arizona	On 10/2/02, DOE approved Arizona's energy audit procedures for single-family houses including the use of REM/Rate on atypical houses to which the priority list does not apply.	Priority lists for single-family houses and mobile homes approved on 3/12/03.	Arizona will install those GHW measures pre-approved by DOE.				DOE's 10/2/02 approval of Arizona's overall energy audit procedures includes mobile home procedures.	Priority lists for single-family houses and mobile homes approved on 3/12/03.	Arizona will install those GHW measures pre-approved by DOE.
Arkansas	On 4/10/01, DOE approved request to use NEAT on every single-family house. Delayed approval of MHEA until revisions are complete.		Arkansas will install those GHW measures pre-approved by DOE.				On 6/22/04, DOE approved Arkansas' mobile home energy audit procedures including the use of MHEA.		Arkansas will install those GHW measures pre-approved by DOE.
California	On 5/14/99, DOE approved California's energy audit procedures for single-family houses, including the use of NEAT for single-family houses.	On 5/14/99, DOE approved 2 priority lists for SF homes: one for climate zone 4 & one for zone 5. On 3/12/01 and 10/15/01 respectively, DOE approved requests to add CFLs and fluorescent torchieres to all existing priority lists.	On 5/14/99, the following GHW materials were approved: evaporative cooler covers, AC vent covers, water heater blankets, 5' of hot water heater pipe insulation, water flow restrictors.						
Colorado	On 1/25/02, DOE approved Colorado's energy audit procedures for single-family houses including the use of NEAT and TAP.	On 1/25/02, DOE approved Colorado's request to use agency-specific priority lists for single-family houses.	Colorado will install those GHW measures pre-approved by DOE.				On 1/25/02, DOE approved Colorado's request to use TAP for mobile homes.	On 1/25/02, DOE approved Colorado's request to use agency-specific priority lists for mobile homes.	Colorado will install those GHW measures pre-approved by DOE.

**Table 1: Weatherization Energy Audit Procedures, Priority Lists, and GHW Lists Reviewed Since 1998**

State	Single Family			Multi-Family			Mobile Home		
	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures
Connecticut	On 5/20/03, DOE approved Connecticut's energy audit procedures for single-family houses including the use of Conservation Services Group's HomeCheck energy audit software.		Connecticut will install those GHW measures pre-approved by DOE.	On 5/20/03, DOE approved Connecticut's energy audit procedures for small multi-family buildings including the use of Conservation Services Group's HomeCheck energy audit software.		Connecticut will install those GHW measures pre-approved by DOE.	On 5/20/03, DOE approved Connecticut's energy audit procedures for mobile homes including the use of Conservation Services Group's HomeCheck energy audit software.		Connecticut will install those GHW measures pre-approved by DOE.
Delaware	DOE is awaiting Delaware's weatherization program standards so that the state's overall energy audit procedures may be reviewed as required by WPN 01-4.	On 2/24/04, DOE approved a priority list for single-family homes that was developed with the assistance of the Weatherization Training Center in Williamsport, PA. The priority list approval requires Delaware to develop weatherization program standards in the 2004-2005 program year.					DOE is awaiting Delaware's weatherization program standards so that the state's overall energy audit procedures may be reviewed as required by WPN 01-4.	The Weatherization Training Center in Williamsport, PA, is currently helping Delaware develop a new priority list for mobile homes.	
D.C.	On 4/25/02, DOE granted conditional approval of DC's energy audit request to use NEAT for single-family houses. On 6/20/02, DOE reviewed DC's newly developed program standards.		DC will install those GHW measures pre-approved by DOE.	On 4/25/02, DOE issued conditional approval of DC's energy audit request to use EA-QUIP for multi-family dwelling units. On 6/20/02, DOE reviewed DC's newly developed program standards.		DC will install those GHW measures pre-approved by DOE.			
Florida									
Georgia	Whole-house weatherization training in Georgia was conducted in March-April 2005. DOE will work with the state on its energy audit procedures as follow-up to the training.	Whole-house weatherization training in Georgia was conducted in March-April 2005. For PY2006, DOE will help the state refine the draft priority list for single-family houses developed as part of the training.	Georgia will install those GHW measures pre-approved by DOE.						
Hawaii									

**Table 1: Weatherization Energy Audit Procedures, Priority Lists, and GHW Lists Reviewed Since 1998**

State	Single Family			Multi-Family			Mobile Home		
	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures
Idaho	On 2/5/02, DOE approved Idaho's energy audit procedures for single-family houses including the use of their EA-3 spreadsheet audit. Idaho subsequently converted spreadsheet tool to Microsoft Excel. On 5/20/03, DOE approved the updated audit tool.		Idaho will install those GHW measures pre-approved by DOE.	EA-3 spreadsheet audit is capable of assessing measures for individually heated multi-family units, but alternative methods are required for central systems. DOE approval of multi-family audit procedures not required since 20% threshold is not exceeded.			On 2/5/02, DOE approved Idaho's energy audit procedures for mobile homes including the use of their EA-3 spreadsheet audit. Idaho subsequently converted spreadsheet tool to Microsoft Excel. On 5/20/03, DOE approved the updated audit tool.		Idaho will install those GHW measures pre-approved by DOE.
Illinois	DOE is awaiting programming revisions to Illinois' web-based energy audit software.								
Indiana	On 10/2/02, DOE approved Indiana's energy audit procedures for single-family houses including the use of NEAT on atypical houses to which the priority list does not apply.	Priority list for single-family houses, mobile homes, and small individually heated multi-family dwelling units approved on 10/2/02.	Indiana plans to install just those GHW measures that are pre-approved by DOE.	Use of NEAT approved on 10/2/02. It will be used on atypical, small, individually heated multi-family dwellings to which the priority list does not apply.	Priority list for single-family houses, mobile homes, and small individually heated multi-family dwelling units approved on 10/2/02.	Indiana plans to install just those GHW measures that are pre-approved by DOE.	Indiana's energy audit procedures for mobile homes were reviewed and approved by DOE as part of the single-family approval.	DOE is currently reviewing Indiana's revalidation of their mobile home priority list using MHEA 7.4.3.3	Indiana plans to install just those GHW measures that are pre-approved by DOE.
Iowa	On 4/11/03, DOE approved Iowa's energy audit procedures for single-family houses, including the use of NEAT. On 3/23/01, refrigerator replacement protocols were approved.		Iowa plans to install just those GHW measures that are pre-approved by DOE.						
Kansas	DOE is currently reviewing Kansas' energy audit procedures for single-family homes.	DOE is currently reviewing Kansas' priority list for single-family homes.					DOE is currently reviewing Kansas' energy audit procedures for mobile homes.	DOE is currently reviewing Kansas' priority list for mobile homes.	
Kentucky	On 5/4/04, DOE approved Kentucky's energy audit procedures for single-family houses including the use of NEAT.						On 5/7/04, DOE approved Kentucky's energy audit procedures for mobile homes including the use of MHEA.		

**Table 1: Weatherization Energy Audit Procedures, Priority Lists, and GHW Lists Reviewed Since 1998**

State	Single Family			Multi-Family			Mobile Home		
	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures
Louisiana	DOE is currently working with Louisiana on their energy audit procedures for single-family homes as part of the state's priority list request.	DOE is currently working with Louisiana on their request for a priority list for single-family homes.					DOE is currently working with Louisiana on their energy audit procedures for mobile homes as part of the state's priority list request.	DOE is currently working with Louisiana on their request for a priority list for mobile homes.	
Maine	On 1/3/02, DOE approved Maine's energy audit procedures for single-family houses including the use of MEADOW 96.		Maine plans to install just those GHW measures that are pre-approved by DOE.	On 1/3/02, DOE approved the use of MEADOW 96 on multi-family buildings containing 25 dwelling units or less with individual heating and cooling systems.			Maine plans to install just those GHW measures that are pre-approved by DOE.	On 1/3/02, DOE approved the use of MEADOW 96 on mobile homes.	Maine plans to install just those GHW measures that are pre-approved by DOE.
Maryland	On 6/21/98, DOE approved Maryland's energy audit procedures for single-family houses including the use of NEAT. Maryland is in the process of preparing a request for re-approval.	Three priority lists for single-family dwellings were approved on 6/21/98: 1) Single-family detached, 2) single-family semi-detached, and 3) single-family row or townhomes. Maryland is in the process of preparing a request for re-approval.	Maryland plans to install just those GHW measures that are pre-approved by DOE.		The 1998 multi-family priority list request was not approved without documentation of cost-effectiveness and a description of the circumstances that would require a site-specific audit in lieu of the priority list.		Maryland plans to install just those GHW measures that are pre-approved by DOE.	The 1998 mobile home priority list request was not approved without documentation of cost-effectiveness and a description of the circumstances that would require a site-specific audit in lieu of the priority list.	Maryland plans to install just those GHW measures that are pre-approved by DOE.
Massachusetts	On 1/22/02, DOE approved Massachusetts' energy audit procedures for single-family houses including the use of NEAT.	A priority list for single-family buildings containing 4 dwelling units or less was approved on 1/22/02.	Massachusetts will install those GHW measures pre-approved by DOE.	On 1/22/02, DOE approved the use of NEAT on small multi-family buildings containing 25 dwelling units or less with individual heating and cooling systems.	A priority list for multi-family buildings containing 25 dwelling units or less was approved on 1/22/02.		Massachusetts will install those GHW measures pre-approved by DOE.	DOE's 10/2/02 approval of Massachusetts' overall energy audit procedures includes mobile home procedures.	A priority list for mobile homes was approved on 1/22/02. Priority list will be reviewed when MHEA has been completed and tested.
Michigan	On 3/4/03, DOE approved Michigan's energy audit procedures including the use of NEAT on atypical homes on which the priority list is not used.	On 3/4/03, DOE approved Michigan's priority list for single-family homes.	Michigan will install those GHW measures pre-approved by DOE.				On 3/4/03, DOE approved Michigan's energy audit procedures including the use of NEAT on atypical homes on which the priority list is not used.	On 3/4/03, DOE approved Michigan's priority list for single-family homes. Priority list will be reviewed when MHEA has been completed and tested.	Michigan will install those GHW measures pre-approved by DOE.
Minnesota	On 1/26/05, DOE approved Minnesota's energy audit procedures including the use of NEAT Version 8.2.4.2.								

**Table 1: Weatherization Energy Audit Procedures, Priority Lists, and GHW Lists Reviewed Since 1998**

State	Single Family			Multi-Family			Mobile Home		
	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures
Mississippi	Whole-house weatherization training in Mississippi concluded in June 2003, which included energy audit procedures for single-family homes. DOE needs to approve Mississippi's procedures in writing for proper documentation.	Whole-house weatherization training in Mississippi concluded in June 2003, which included development of a priority list for single-family homes. DOE needs to approve Mississippi's priority list in writing for proper documentation.	Mississippi plans to install just those GHW measures that are pre-approved by DOE.				Whole-house weatherization training in Mississippi concluded in June 2003, which included energy audit procedures for mobile homes. DOE needs to approve Mississippi's procedures in writing for proper documentation.	Whole-house weatherization training in Mississippi concluded in June 2003, which included development of a priority list for single-family homes, but not for mobile homes. Until DOE approves a mobile home priority list, Mississippi should continue to run MHEA for every mobile home weatherized.	Mississippi plans to install just those GHW measures that are pre-approved by DOE.
Missouri	On 12/10/03, DOE approved Missouri's energy audit approval request.		Missouri plans to install just those GHW measures that are pre-approved by DOE.				On 12/10/03, DOE approved Missouri's energy audit approval request.	On 12/10/03, DOE approved Missouri's energy audit approval request. Missouri is currently gaining experience with the newly released MHEA. The state will either require the site-specific application of MHEA or will revisit their mobile home priority list.	Missouri plans to install just those GHW measures that are pre-approved by DOE.
Montana	On 2/5/02, DOE approved Montana's energy audit procedures for single-family houses including the use of their spreadsheet audit tool.		Montana plans to install just those GHW measures that are pre-approved by DOE.				On 2/5/02, DOE approved Montana's request to use their spreadsheet audit on mobile homes.		Montana plans to install just those GHW measures that are pre-approved by DOE.
Nebraska	On 12/8/03, DOE approved Nebraska's energy audit procedures for single-family houses.	On 12/8/03, DOE approved Nebraska's priority lists for single-family houses.					On 12/8/03, DOE approved Nebraska's energy audit procedures for mobile homes.	On 12/8/03, DOE approved Nebraska's priority lists for mobile homes.	
Nevada	On 1/19/05, DOE approved Nevada's energy audit procedures for single-family houses including the use of the REM/Rate energy audit software.	On 1/19/05, DOE approved Nevada's priority list for single-family houses.		On 1/19/05, DOE approved Nevada's energy audit procedures for multi-family buildings including the use of the REM/Rate energy audit software.	On 1/19/05, DOE approved Nevada's priority list for multi-family houses.		On 1/19/05, DOE approved Nevada's energy audit procedures for mobile homes including the use of the REM/Rate energy audit software.	On 1/19/05, DOE approved Nevada's priority list for mobile homes.	

**Table 1: Weatherization Energy Audit Procedures, Priority Lists, and GHW Lists Reviewed Since 1998**

State	Single Family			Multi-Family			Mobile Home		
	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures
New Hampshire	On 10/2/03, DOE granted New Hampshire an extension for submitting their energy audit approval request due to reorganization at the state's weatherization office. DOE believes ample adjustment time has elapsed. New Hampshire should submit its energy audit procedures to DOE for review.								
New Jersey	On 1/22/03, DOE approved New Jersey's request to use EA-QUIP for single-family houses.	On 5/27/04, DOE approved New Jersey's priority list for single-family homes.	New Jersey plans to install just those GHW measures that are pre-approved by DOE.	On 1/22/03, DOE approved New Jersey's request to use EA-QUIP for multi-family houses.		New Jersey plans to install just those GHW measures that are pre-approved by DOE.			
New Mexico	DOE received New Mexico's energy audit request on 6/23/04. DOE provided comments to Regional Office on 10/28/04. DOE is awaiting New Mexico's response.								
New York	On 9/8/03, DOE approved New York's energy audit procedures for single-family houses including the use of the TIPS energy audit tool. DOE approved New York's use of TREAT on 12/4/03.			On 12/4/03, DOE approved New York's request to use TREAT. DOE approved the Windows version of EA-QUIP on 8/9/04, which New York uses.					
North Carolina	North Carolina has recently trained agencies & contractors based on the Mississippi pilot model. DOE will work with North Carolina developing technical program standards.	At North Carolina's request, DOE assisted the state in developing a priority list for single-family homes.					North Carolina has recently trained agencies & contractors based on the Mississippi pilot model. DOE will work with North Carolina developing technical program standards.	At North Carolina's request, DOE assisted the state in developing a priority list for mobile homes, which will be revisited in the coming months using the recently released MHEA.	

**Table 1: Weatherization Energy Audit Procedures, Priority Lists, and GHW Lists Reviewed Since 1998**

State	Single Family			Multi-Family			Mobile Home		
	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures
North Dakota	On 9/10/03, DOE approved North Dakota's energy audit procedures including the use of the WXEOR energy audit software tool provided that default R-values for certain building shell components are updated.						On 9/10/03, DOE approved North Dakota's energy audit procedures including the use of the WXEOR energy audit software tool provided that default R-values for certain building shell components are updated.		
Ohio	On 6/19/01, DOE approved Ohio's energy audit procedures for single-family houses including the use of NEAT on atypical units to which the priority list does not apply.	Priority lists for single-family houses was approved by DOE on 6/19/01.	Ohio plans to install just those GHW measures that are pre-approved by DOE.	Use of NEAT approved on 6/19/01. It will be used on atypical, small, individually heated multi-family dwellings to which the priority list does not apply.	Priority lists for small individually heated multi-family dwelling units was approved by DOE on 6/19/01.	Ohio plans to install just those GHW measures that are pre-approved by DOE.	Ohio is currently participating in the MHEA validation effort.	Priority lists for mobile homes was approved by DOE on 6/19/01. Ohio will revisit mobile home priority list when MHEA the MHEA validation effort is complete.	Ohio plans to install just those GHW measures that are pre-approved by DOE.
Oklahoma	DOE received Oklahoma's energy audit request on 6/23/04. DOE provided comments to Regional Office on 8/21/04. DOE is awaiting Oklahoma's response.								
Oregon	On 8/7/01, DOE approved Oregon's energy audit procedures for single-family houses including the use of Portland General Electric's Residential Energy Evaluation Software (REES). Oregon also received interim approval on to use REM/Rate on 7/14/00 and SMOC-ERS on 4/7/03.		Oregon plans to install just those GHW measures that are pre-approved by DOE.	On 8/7/01, DOE approved Oregon's request to use Portland General Electric's Residential Energy Evaluation Software (REES) on multi-family buildings.		Oregon plans to install just those GHW measures that are pre-approved by DOE.	On 8/7/01, DOE approved Oregon's request to use Portland General Electric's Residential Energy Evaluation Software (REES) on mobile homes. On 4/7/03, Oregon also received interim approval on to use REM/Rate.		Oregon plans to install just those GHW measures that are pre-approved by DOE.
Pennsylvania	Use of NEAT approved on 10/16/01. It will be used on atypical single-family houses to which the priority list does not apply.	Priority list for single-family houses was approved on 10/16/01.	Pennsylvania plans to install just those GHW measures that are pre-approved by DOE.				DOE 10/16/01 approval included a review of Pennsylvania's mobilehome energy audit procedures.	On 4/26/05, DOE approved Pennsylvania's mobile home priority list.	Pennsylvania plans to install just those GHW measures that are pre-approved by DOE.

**Table 1: Weatherization Energy Audit Procedures, Priority Lists, and GHW Lists Reviewed Since 1998**

State	Single Family			Multi-Family			Mobile Home		
	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures
Rhode Island	On 7/29/03, DOE approved Rhode Island's energy audit procedures for single-family houses including the use of NEAT on atypical units to which the priority list does not apply.	On 7/29/03, a priority list for single-family houses was approved.	Rhode Island plans to install just those GHW measures that are pre-approved by DOE.						
South Carolina	On 3/11/02, DOE approved the use of NEAT for single-family houses on which the approved priority list cannot be used.	On 3/11/02, DOE approved South Carolina's NEAT-based priority list for single-family dwellings.	South Carolina plans to install just those GHW measures that are pre-approved by DOE.						
South Dakota	On 3/4/03, DOE approved South Dakota's energy audit procedures for single-family houses including the use of NEAT.		South Dakota plans to install just those GHW measures that are pre-approved by DOE.				On 3/4/03, DOE approved the use of NEAT for single-family houses. South Dakota will continue to use their current mobile home procedures until MHEA becomes available.		South Dakota plans to install just those GHW measures that are pre-approved by DOE.
Tennessee	On 3/27/03, DOE approved Tennessee's energy audit procedures for single-family houses including the use of NEAT.	DOE assisted Tennessee in re-designing their priority list for single-family houses, which was approved on 3/27/03 with the overall energy audit procedures.	Tennessee plans to install just those GHW measures that are pre-approved by DOE.				On 3/27/03, DOE approved Tennessee's energy audit procedures for mobile homes, which will include MHEA when it becomes available.	DOE assisted Tennessee in re-designing their priority list for mobile homes, which was approved on 3/27/03 with the overall energy audit procedures. When MHEA becomes available, the priority list will be re-visited.	Tennessee plans to install just those GHW measures that are pre-approved by DOE.
Texas	On 1/7/02, DOE approved the use of EASY II DB on single-family buildings containing 4 dwelling units or less.		Texas plans to install just those GHW measures that are pre-approved by DOE.	On 1/7/02, DOE approved the use of EASY II DB on multi-family buildings containing 25 dwelling units or less with individual heating and cooling systems.		Texas plans to install just those GHW measures that are pre-approved by DOE.	On 1/7/02, DOE approved the use of EASY II DB on mobile homes.		Texas plans to install just those GHW measures that are pre-approved by DOE.
Utah	On 7/1/04, DOE approved Utah's energy audit procedures for single-family houses including the use of NEAT.		Utah plans to install just those GHW measures that are pre-approved by DOE.				On 7/1/04, DOE approved Utah's energy audit procedures for mobile homes including the use of MHEA.		Utah plans to install just those GHW measures that are pre-approved by DOE.
Vermont	On 5/23/03, DOE approved Vermont's energy audit procedures including the use of NEAT		Vermont plans to install just those GHW measures that are pre-approved by DOE.			Vermont plans to install just those GHW measures that are pre-approved by DOE.			Vermont plans to install just those GHW measures that are pre-approved by DOE.

**Table 1: Weatherization Energy Audit Procedures, Priority Lists, and GHW Lists Reviewed Since 1998**

State	Single Family			Multi-Family			Mobile Home		
	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures	Audit	Priority List	GHW Measures
Virginia	On 12/9/02, DOE approved Virginia's energy audit procedures for single-family houses including the use of NEAT.	On 12/9/02, DOE approved Virginia's priority list for single-family houses.	Virginia plans to install just those GHW measures that are pre-approved by DOE.					On 12/9/02, DOE approved Virginia's priority list for mobile houses. Now that MHEA has been released, Virginia's mobile home priority list should be revisited.	Virginia plans to install just those GHW measures that are pre-approved by DOE.
Washington	On 3/12/03, DOE approved Washington's energy audit procedures for single-family houses, including the use of NEAT. A request to use TREAT was approved on 3/16/05.	On 3/12/03, DOE approved Washington's priority lists for single-family houses.	Washington plans to install just those GHW measures that are pre-approved by DOE.	Washington's request to use TREAT was approved by DOE on 3/16/05.		Washington plans to install just those GHW measures that are pre-approved by DOE.	Washington's request to use TREAT was approved by DOE on 3/16/05.		Washington plans to install just those GHW measures that are pre-approved by DOE.
West Virginia	On 5/17/02, DOE approved West Virginia's energy audit procedures for single-family houses including the use of NEAT on atypical units to which the priority list does not apply.	Priority lists for single-family houses and mobile homes approved on 5/17/02.	West Virginia plans to install just those GHW measures that are pre-approved by DOE.	Multi-family dwellings represent < 20% of units weatherized. As a result, multi-family energy audit procedures do not require DOE approval.	Multi-family dwellings represent < 20% of units weatherized. As a result, multi-family energy audit procedures, including priority lists, do not require DOE approval.	West Virginia plans to install just those GHW measures that are pre-approved by DOE.	West Virginia will adopt MHEA when revisions are complete. At that time, West Virginia needs only to submit two sample MHEA audit runs for review.	Priority lists for single-family houses and mobile homes approved on 5/17/02. West Virginia will revisit this priority list when MHEA becomes available.	West Virginia plans to install just those GHW measures that are pre-approved by DOE.
Wisconsin	On 8/5/03, DOE approved Wisconsin's energy audit procedures for single-family houses including the use of NEAT on atypical units to which the priority list does not apply.	A priority list for single-family houses was approved by DOE on 1/14/05.	Wisconsin plans to install just those GHW measures that are pre-approved by DOE.	On 8/5/03, DOE approved Wisconsin's energy audit procedures for small multi-family buildings.	Wisconsin will revisit its multi-family priority list after they have updated their mobile home priority list.	Wisconsin plans to install just those GHW measures that are pre-approved by DOE.	On 8/5/03, DOE approved Wisconsin's energy audit procedures for mobile homes.	Now that Wisconsin has completed updating the priority list for single-family homes, they are revisiting their mobile home priority list.	Wisconsin plans to install just those GHW measures that are pre-approved by DOE.
Wyoming	Wyoming will submit their energy audit procedures for approval once the new state program manager gets acclimated.	On 1/21/03, DOE approved Wyoming's priority list for single-family houses					Wyoming will submit their energy audit procedures for approval once the new state program manager gets acclimated.	On 1/21/03, DOE approved Wyoming's priority list for mobile homes.
