Cheers to the Idaho weatherization assistance program. My electric power bill was \$228 a month on level pay and scheduled to go up another \$50 to \$75. Weatherization came in late summer and completely weatherized my older mobile home with lots of insulation, caulking of windows, new doors, windows, a heat pump, range hood, plus other needs. The men were polite, respectful, well organized and skilled. My level pay has dropped to \$150 a month, which is a huge savings to a senior on limited income.
