

To everyone involved with the Weatherization program:

I want to express my profound appreciation for the work done in my home. Being the owner of an older home has been difficult. As I myself got up in years, repairs were daunting being both numerous and expensive. Even if the scope of your program had been limited to attic insulation, I would have been grateful.

But your agency provided so much more including new windows, caulking, insulation, a new refrigerator etc. etc. There is just too much to list and these things were far beyond my expectations.

The team that did the work was totally professional. It was hard to imagine how they would be able to finish in one day, but they did. They were very respectful and industrious and I would have no problem recommending them. You are lucky to have a group like that as your representatives. I also want to mention the original two men who made the recommendations for the job. They were thorough and extremely personable.

I've seen firsthand how President Obama's stimulus money has impacted so many people. The construction team has work and is expanding, and I have received a gift that I couldn't have imagined a few years ago. Thanks to all!
